Re. **Oppose SB 857** **Harms parks, game lands & fishing access**

Dear Members of the Pennsylvania State Senate:

On behalf of the 75 member organizations of WeConservePA and their 96,000 Pennsylvania members, I ask you to **OPPOSE SB 857** if the bill receives further consideration in the Senate.

SB 857 requires county governing body approval of any land purchase or gift acceptance by DCNR, Game Commission, and Fish and Boat Commission. While official county approval might seem reasonable on its face, this requirement would be unduly damaging to the responsible care of Pennsylvania's State Parks, Forests, and Game Lands; the recreational, wildlife, and economic values provided by those lands; and strategic additions to the lands. It would additionally hamper expansion of fishing and boating access to Pennsylvania's waterways.

WeConservePA believes that DCNR, the Game Commission, and Fish and Boat Commission should maintain strong communications with and respect for the concerns of local government as the agencies consider acquisitions for the public good. However, SB 857 is a blunt instrument that would hobble the agencies' ability to constructively address inholdings and strategically expand holdings to facilitate land management and better serve Pennsylvanians.

- The bill would disempower a private landowner who wishes to donate *their land* to a state agency for the good of all the public.
- The bill creates a massive hurdle for any landowner anywhere in the Commonwealth to agree to convey land to one of the agencies—a process that is already long and complex. A seller in a real estate transaction will be exceedingly resistant to a purchase and sale agreement contingency that requires *approval of a third party*, especially if the state agency will not pay a premium for the contingency and the third party is tied into the vagaries of politics.
- To the extent that a seller would be willing to agree to such a contingency, the resulting transaction would be costly to state agencies and taxpayers because either (1) the agency will need to provide sellers with additional inducements to agree or (2) the agency will need to get county approval in advance of reaching agreement with a landowner, which

would place the agency in a severely weakened negotiating position, the seller knowing that the purchaser has already gone to extraordinary lengths to advance the transaction.

- WeConservePA respects that some legislators and county officials generally disfavor expansion of State Parks, Forests, and Game Lands in their jurisdictions. State agencies should always be greatly attentive to local concerns; however, it is not appropriate to fully subjugate well-considered state decisions regarding the well-being of 13.1 million Pennsylvanians to the will of a single one of Pennsylvania's 67 county governing bodies (two dozen representing fewer than 50,000 residents).
- The bill could establish problematic patterns of behavior—the making of inappropriate or unreasonable demands in exchange for approvals.

Insufficient local tax revenue is raised as the impetus for the bill. However, the General Assembly has already established public policy to address this with the Payment in Lieu of Taxes (PILT) program, which has been increased twice in the past four years and is now indexed to the Consumer Price Index. If inequities do exist at this time, PILT remains the appropriate pathway to address them.

Susquehanna Polling and Research this spring found that 94% of likely Pennsylvania voters believe that our State Parks and Forests are “very” or “somewhat” important to quality of life in Pennsylvania—fully 85% finding them “very” important. This tremendous support is consistent across party identification, region, and other demographics. Please preserve the ability of state agencies to improve and strategically expand these much-loved lands for the health and enjoyment of the public, the conservation of wildlife, and support of the outdoor recreation economy.

Thank you for your consideration.

Sincerely,

Andrew M. Loza
Executive Director
